Hello Port Graham, My name is Osi, (pronounced Oh-see) I was born in the US and raised in Israel from age 3, my mother tongue is Hebrew. Like all high school graduates in Israel, I was drafted to mandatory active duty of 2 years in the Israeli Defense Army. I served as a social worker and a commander of the women on the base. I became a lieutenant and even got to do parachute course, and jump out of an airplane 3 times.

Half year after my release from active duty, I was called to duty in the Lebanese war of 1982. I lost friends. My duty in the reserves was to accompany and attend to the needs of grieving families. I was young and that experience weighed heavy on my heart.

After that experience, I got to travel to the Far East (Nepal, India) and trekked in the Himalayas (The Annapurna Pass). That soothed me and I was ready to return to the US and continue my higher education. I did both my Bachelor’s and Master’s degrees in the Northeast coast (NY, NH, ME) and became a licensed professional counselor.

I studied Counseling Psychology and Dance/Movement Therapy. I love dance and the arts. I believe in their power to heal when used as a tool to express the self. I find solace in nature, and also go camping and hiking.

I worked with survivors of domestic violence, adolescents and adults, specializing in expressive arts therapy, in emergency mental health as well as trauma/grief counseling. I like working with individuals but also facilitate groups. I can support and counsel people who wish to recover from drug/alcohol addiction.

I came to Alaska in 2008 to work in Kotzebue and the Northwest villages of the Inupiaq people I greatly enjoyed working and living up in the arctic. From there I moved to Homer

Port Graham
Traditional Values

With guidance and
support from our
Elders, we teach our
children Alutiiq values

Sugpiaq/Alutiiq Value of the Month:

Unconditional Love
Are You an Alcoholic?

Before we can successfully treat any disease we must diagnose or recognize the disease by the symptoms. Alcoholism is a disease that can be diagnosed and treated early, not everyone has to “hit bottom”. This screening tool has been internationally recognized as useful and accurate for use by doctors and professionals in primary care settings.

The CAGE Test for Alcohol Addiction

This simple test is surprisingly accurate. Answer yes or no to each question.(1)

1. Have you ever thought you should Cut down your drinking?
2. Have you ever felt Annoyed when people have commented on your drinking?
3. Have you ever felt Guilty or badly about your drinking?
4. Have you ever had an Eye opener first thing in the morning to steady your nerves or get rid of a hangover?

Your score:
Score one point for each yes answer.
If you scored 1, there is a 75% chance you’re addicted to alcohol.
If you scored 2, there is an 85% chance you’re addicted to alcohol.
If you scored 3, there is a 99% chance you’re addicted to alcohol.
If you scored 4, there is a 100% chance you’re addicted to alcohol.

If you have scored two or more on this simple self-test you may want to see a professional counselor or seek help from other people who have found sobriety through 12 step programs like Alcoholics Anonymous (A.A.).
DO YOU HAVE INFORMATION FOR THE NEWSLETTER?

Do you have an announcement, news or an upcoming event you would like to include in the Port Graham Village Council’s Newsletter, Kalikahpet?

Port Graham Village Council invites you to submit information to be considered for publication in our newsletter which can be viewed in startling color online at our website: www.portgraham.org

Regional Addictions Coordinator
Tosha Saincome, Port Graham’s Regional Addiction Coordinator will be coming in every other week, Monday thru Wednesdays, if you would like to schedule an appointment, please call 284-2261 or 334-0134.

Nyia Charest is Back!
Nyia Charest is a Licensed Clinical Social Worker. She serves the villages of Port Graham and Nanwalek. She’s honored to be back in such a beautiful place and to get to know the people here again!

Reminder:
Every Thursday morning the entire clinic staff is in an online meeting. The only patients who will be seen are emergencies. Thank you!

Continued from page 1 ‘Osi Kaspi’

where I’ve been living and working for the past 4 years. I served as an on-call emergency mental health clinician.

Inherent in my way of life and therapy is respecting all being, available to listen and guide. I see counseling as a joint effort and participation. I treat the person as a whole: Body/Mind/Soul. Paying attention to all aspects of one’s life, as all is connected. I use positive psychology, humanistic and client-centered approach. I use tools such as mindfulness, relaxation and emphasize self-compassion.

I look forward to continuing to learn about the Alutiiq culture, it’s so fascinating! I’m honored to serve the people of Port Graham and Nanwalek. I thank you for opening your doors to me. Please feel free to reach me anytime I’m here in the village at the clinic, 284-2241.

will be in October 25-28,
to serve ADULT PATIENTS

Angela McKinney will be in
October 31-November 4, to DO CLEANINGS

PLEASE CALL 284-2241 to set up an APPOINTMENT
Chugachmiut’s Local Education Programs Retreat held August 8 through 12 turned out GREAT!

Local Education Coordinators, Sug’t’stun Teachers, regional staff, various school district employees and Patty from CRRC attended and contributed to the events. Much was learned and passed on to each other during the retreat. Chugachmiut Heritage kit displays were be set up for viewing at the school during the retreat. It was a good opportunity to see what Chugachmiut’s Heritage Kits contained. On the final day, we got to have a huge bon fire. Everyone there enjoyed all the comradery of all the Local Education Coordinators and Educators.

I will be holding Elder meetings on the 15th and 30 of each month to discuss the new Heritage kit, ‘Traditional Weather Forecast’. I will provide a small lunch and hope Elders come and share information!
Port Graham Village Water Treatment

Is my water safe?
Yes, our Water Treatment Facility is monitored 24 hours by computer software and inspected twice daily by our Operator. All Testing and Reporting Requirements are completed in a timely manner. And The Water Operator holds a Level 2 certification from the State of Alaska.

Do I need to take special precautions?
Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/Centers for Disease Control (CDC) guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Water Drinking Hotline (800-426-4791). Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/Centers for Disease Control (CDC) guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Water Drinking Hotline (800-426-4791).

Where does my water come from?
Port Graham's water originates from a reservoir that is a dammed creek southwest of the village. The water is treated to protect the system and consumers from sediment and microorganisms that may be in the source water.

Source water assessment & its availability
To learn more about your water, including the source water assessment, you can visit the Alaska Department Of Environmental Conservation’s Drinking Water Watch webpage. http://dec.alaska.gov:8080/DWW/

How can I get involved?
If you are interested in learning more, contact the Port Graham Village Council Offices. Report any

Water Leaks to the Port Graham Village Council

Water Conservation Tips
Did you know that the average U.S. household uses approximately 400 gallons of water per day or 100 gallons per person per day? Luckily, there are many low-cost and no-cost ways to conserve water. Small changes can make a big difference - try one today and soon it will become second nature.

- Take short showers - a 5 minute shower uses 4 to 5 gallons of water compared to up to 50 gallons for a bath.
- Shut off water while brushing your teeth, washing your hair and shaving and save up to 500 gallons a month.
- Use a water-efficient showerhead. They're inexpensive, easy to install, and can save you up to 750 gallons a month.
- Run your clothes washer and dishwasher only when they are full. You can save up to 1,000 gallons a month.
- Water plants only when necessary.
- Fix leaky toilets and faucets. Faucet washers are inexpensive and take only a few minutes to replace. To check your toilet for a leak, place a few drops of food coloring in the tank and wait. If it seeps into the toilet bowl without flushing, you have a leak. Fixing it or replacing it with a new, more efficient model can save up to 1,000 gallons a
Congressman Don Young Visits Port Graham

A Potluck for Congressman Don Young was hosted in Port Graham on August 3, 2016. The community center was abuzz with preparations for the potluck to honor him and the work he’s done for our state and in turn our community.

Port Graham's Chief Patrick Norman and Chief John Kvasnikoff from Nanwalek both attended the festivities. Everyone was happy to get their photos taken with the Congressman.

Source Water Protection Tips

Protection of drinking water is everyone's responsibility. You can help protect your community's drinking water source in several ways:

- Eliminate use of lawn and garden fertilizers and pesticides - they contain hazardous chemicals that can reach your drinking water source.
- Pick up after your pets.
- If you have your own septic system, properly maintain your system to reduce leaching to water sources or consider connecting to a public water system.
- Dispose of chemicals properly; take used motor oil to a recycling center.
- Volunteer in your community. Find a watershed or wellhead protection organization in your community and volunteer to help. If there are no active groups, consider starting one. Use EPA's Adopt Your Watershed to locate groups in your community, or visit the Watershed Information Network's How to Start a Watershed Team.
- Organize a storm drain stenciling project with your local government or water supplier. Stencil a message next to the street drain reminding people "Dump No Waste - Drains to River" or "Protect Your Water." Produce and distribute a flyer for households to remind residents that storm drains dump directly into your local water body.

Changes to Water System over the past year:

The Amount of chlorine required by the state was doubled from .20mg/l to .40mg/l

month.
- Adjust sprinklers so only your lawn is watered. Apply water only as fast as the soil can absorb it and during the cooler parts of the day to reduce evaporation.
- Teach your kids about water conservation to ensure a future generation that uses water wisely. Make it a family effort to reduce next month's water bill!

Visit [www.epa.gov/watersense](http://www.epa.gov/watersense) for more information.
